

Firmware Upgrade Guidelines for Sineoji 600Mbps Gigabit HomePlug AV2, PL600EPG

1. Download the PL600EPG firmware and unzip it into a folder “PL600EPG”.
2. Download the Power Packet Utility, execute it and proceed with the installation.
3. Open the Power Packet Utility and select “Advanced”.

4. Select “Upgrade” and locate the folder “PL600EPG” where you have unzipped the folder to the files “nvm” and “pib” file extension respectively.

5. After selecting these files, the upgrade will be performed. A message will be shown as follows when the upgrade is successful. Click OK to continue and the process will be completed.
